The number pyramids as "Omikuji"

Introduction
"Omikuji" is the source of this teaching material. "Omikuji" is a traditional lot in Japanese shrine. Usually it has some sorts of fortune. The best one is "Daikichi". If you get this one, you will feel so nice! The second one is "Kichi". It's not so good. The last one is "Kyo". If you get this one, you will feel so bad. And you will want to challenge again!

Let's play "Omikuji"!

Divide the top number by 3. If the result has zero remainder, it's ... "Daikichi"
It's very happy.

Divide the top number by 3. If the result has 1 remainder, it's ... "Kichi"
It's not so good.

Divide the top number by 3. If the result has 2 remainder, it's ... "Kyo"
It's too bad.

Decide your destiny!!
Why did your fortune decide so? If you can see the reason, you can decide your destiny by yourself!!
